Jaime Alonso García-Amorena

Full-Stack Developer · React / Next.js / TypeScript / Node.js

Madrid, Spain · alonsog.jaime@gmail.com · +34 684 332 575
Portfolio: https://jaimealonso.dev/ · GitHub: https://github.com/JaimeAlonsoGA · LinkedIn: https://www.linkedin.com/in/jaime360/

Remote full-stack developer (≈2 years professional). I ship web and mobile products end to end: Next.js/React frontends, Node APIs, PostgreSQL, and React Native apps. Comfortable with AI chat/agent features (including MCP) and production tooling (Docker, CI/CD, testing).

EXPERIENCE

Welloop AB (Sweden) · Full-Stack Developer · Remote Jun 2025 – Present

Youth sports platform

- Build web apps and backend services with Next.js, React, Node.js and TypeScript.
- Shipped an AI-powered chat with custom permission access, plus payments, integrations, notifications and a team-management surface (events and communications).
- Automate development workflows with AI agent tooling and evaluation loops.

MIRTO · Software Developer Jun 2024 – Jun 2025

Luxury clothing brand

- Built and launched the commercial (shopping) mobile app for MIRTO, a luxury clothing brand, in React Native, integrated with Shopify.
- Built the internal business operations app with React and Node.js (analytics, notifications and factory operations).
- Built a Shopify integration to synchronise product listings across international stores.

SELECTED PROJECTS

- **Sona** · AI generative audio VST plugin and desktop app on a subscription SaaS model, combining audio LLMs from several providers, with production observability. portfolio
- **Magic Envelope** · Free invitations that open in a sealed envelope; per-guest links, RSVP, REST API and MCP server for agents. magic-envelope.com
- **Grasshopper** · CLI that carries a session from one AI agent to another, locally (no network, no account, no model calls). hopcli.dev · GitHub
- **Quickeys** · Online piano for looking up notes, chords and scales, with static SEO pages per chord and scale. GitHub
- **Vor2ex** · Amazon product finder and niche analyzer for FBA sellers (degree capstone). GitHub
- **Super Bullish** · Crypto Web3 video customization platform. GitHub
- **Alchimix** · React Native app for creating custom cocktails, with a medieval theme; published on Google Play. Google Play · GitHub
- **Bio Visu** · React Native study app built with a biologist to help graduates pass the Visu exam. GitHub

SKILLS

TypeScript · React · Next.js · Node.js · PostgreSQL / SQL · React Native · REST APIs · Docker · CI/CD · AWS · Testing · UI/UX · Capacitor / PWA · MCP / AI agents
